## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because they do not contain reference numerals for the various elements of the invention. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the booster pump and head having apertures must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

The disclosure is objected to because of the following informalities: The specification should contain reference numerals for the various elements described.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1761

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Klaassen.

There is disclosed in Klaassen a device for injecting liquid, the device comprising: a low pressure air pump arrangement (booster pump) 25, 32, 33 adapted to receive an injecting liquid from a supply 27, and a head 4 having apertures 10 for nozzles, the head being in fluid communication with the pump.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Handell et al and Allinquant et al are cited for their disclosure of a low pressure air pump to deliver injecting liquid to a set of nozzles. Otsuka et al and Tanaka et al are cited for their disclosure of the state of the art.
